1. Identification

Product identifier: Disodium Octaborate Tetrahydrate Treated Wood
Other means of identification: None known.
SDS number: 200-TIM-E
Recommended use: Preservative Treated Wood for interior/weather protected exterior uses.
Recommended restrictions: None known.

Manufacturer/Importer/Supplier/Distributor information
Licensees/Customers of Timber Specialties Co.

Company name: Timber Specialties Co.
Address: [Address]
Telephone: [Telephone]
E-mail: [E-mail]
Contact person: [Contact person]
Emergency phone number: [Emergency phone number]

2. Hazard(s) identification

Physical hazards: Combustible dusts Category 1
Health hazards: Carcinogenicity (inhalation) Category 1
Environmental hazards: Not classified.

Label elements
Hazard symbol: 
Signal word: Danger
Hazard statement: May cause cancer by inhalation. May form combusible dust concentrations in air.
Precautionary statement
Prevention: Obtain special instructions before use (see Section 16). Do not handle until all safety precautions have been read and understood. Wash thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Prevent dust accumulation to minimize explosion hazard. Observe good industrial hygiene practices.
Response: If exposed or concerned: Get medical advice/attention. In case of fire: Use alcohol-resistant foam, carbon dioxide, dry powder or water fog for extinction.
Disposal: Dispose in accordance with local/regional/national/international regulations.
Other hazards: None known.
Supplemental information: None.

3. Composition/information on ingredients

Mixtures
Chemical name: Wood / Wood dust
CAS number: N/A
%: 99

Chemical name: Disodium octaborate tetrahydrate
CAS number: 12280-03-4
%: 1

Composition comments: Depending on the additives applied to the treating solution, this wood may also contain <1% of mold inhibitors, <1% of a wax emulsion, and/or <1% of a colorant. None of these ingredients are classified as carcinogens. Components not listed are either non-hazardous or are below reportable limits.
4. First-aid measures

**Inhalation**
Move to fresh air. Call a physician if symptoms develop or persist. Some species may cause allergic respiratory reactions with asthma-like symptoms in sensitized individuals.

**Skin contact**
Wash off with soap and water. Get medical attention if irritation develops and persists. Prolonged contact with treated wood and/or treated wood dust, especially when freshly treated at the plant, may cause irritation to the skin. Abrasive handling or rubbing of the treated wood may increase skin irritation. Some wood species, regardless of treatment, may cause dermatitis or allergic skin reactions in sensitized individuals. In case of rashes, wounds or other skin disorders: Seek medical attention and bring along these instructions.

**Eye contact**
Do not rub eye. Immediately flush eye(s) with plenty of water. Remove any contact lenses and open eyelids wide apart. If irritation persists, get medical attention.

**Ingestion**
Rinse mouth thoroughly. Get medical attention if any discomfort occurs.

**Most important symptoms/effects, acute and delayed**
Wood dust: May cause nasal dryness, irritation and mucostasis. Coughing, wheezing, sneezing, sinusitis and prolonged colds have also been reported. Depending on wood species may cause respiratory sensitization and/or irritation. Mechanical irritation of skin, eyes and respiratory system.

**Indication of immediate medical attention and special treatment needed**
Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

**General information**
If exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.

5. Fire-fighting measures

**Suitable extinguishing media**
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2). Apply extinguishing media carefully to avoid creating airborne dust.

**Unsuitable extinguishing media**
Do not use water jet as an extinguisher, as this will spread the fire.

**Specific hazards arising from the chemical**
Explosion hazard: Depending on moisture content, and more importantly, particle diameter and airborne concentration, wood dust in a contained area may explode in the presence of an ignition source. Wood dust may similarly deflagrate (combustion without detonation like an explosion) if ignited in an open or loosely contained area. An airborne concentration of 40 grams (40,000 mg) of dust per cubic meter of air is often used as the LEL for wood dusts. Reference NFPA Standards- 654 and 664 for guidance.

**Self-contained breathing apparatus and full protective clothing must be worn in case of fire.**

**In case of fire and/or explosion do not breathe fumes.**

**Use standard firefighting procedures and consider the hazards of other involved materials.**

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**
Keep unnecessary personnel away. Use only non-sparking tools. Avoid generation and spreading of dust. Avoid inhalation of dust. Provide adequate ventilation. Wear appropriate personal protection equipment (see Section 8).

**Methods and materials for containment and cleaning up**
Sweep or vacuum up spillage and collect in suitable container for disposal. If not possible, gently moisten dust before it is collected with shovel, broom or the like. Flush area with water. Clean surface thoroughly to remove residual contamination. For waste disposal, see Section 13.

**Environmental precautions**
Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

**Precautions for safe handling**
Read SDS before use. Avoid prolonged or repeated breathing of dust. Avoid prolonged or repeated contact with skin. Do not smoke. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Wear appropriate personal protective equipment (See Section 8). Avoid release to the environment. Do not burn preserved wood. Do not use preserved wood as mulch.

**Conditions for safe storage, including any incompatibilities**
Keep away from heat, spark, open flames and other sources of ignition. Store away from incompatible materials (see Section 10 of the SDS).
8. Exposure controls/personal protection

**Biological limit values**

No biological exposure limits noted for the ingredient(s).

**Appropriate engineering controls**

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

**Individual protection measures, such as personal protective equipment**

**Eye/face protection**

Wear safety glasses with side shields or safety goggles when sawing or cutting.

**Skin protection**

**Hand protection**

Leather gloves provide sufficient hand protection. Chemical resistant gloves may be necessary for handling freshly treated wood.

**Other**

Wear long sleeve shirt, pants, and closed-toed shoes when handling wood.
Respiratory protection
In case of insufficient ventilation, wear suitable respiratory equipment. Wear dust mask when sawing or sanding wood. If exposure limits are exceeded or if irritation is experienced, a NIOSH-approved positive pressure self-contained breathing apparatus should be worn.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations
Observe any medical surveillance requirements. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, chewing gum, using tobacco, or using the toilet.

9. Physical and chemical properties

| Appearance | Physical state | Solid. |
| Form | Solid. Chips. Dust. |
| Color | Various. |
| Odor | Wood odor. |
| Odor threshold | Not available. |
| pH | Not available. |
| Melting point/freezing point | Not available. |
| Initial boiling point and boiling range | Not available. |
| Flash point | Not available. |
| Evaporation rate | Not available. |
| Flammability (solid, gas) | Combustible dust. |

Upper/lower flammability or explosive limits

| Flammability limit – lower (%) | Not available. |
| Flammability limit – upper (%) | Not available. |
| Explosive limit - lower (%) | Not available. |
| Explosive limit - upper (%) | Not available. |

Vapor pressure
Not available.

Vapor density
Not available.

Relative density
0.4 - 0.8 (Water = 1)

Solubility(ies)

| Solubility (water) | Highly insoluble. |
| Solubility (n-octanol/water) | Not available. |

Auto-ignition temperature
Not available.

Decomposition temperature
Not available.

Viscosity
Not available.

10. Stability and reactivity

Reactivity
The product is non-reactive under normal conditions of use, storage and transport.

Chemical stability
Stable at normal conditions.

Possibility of hazardous reactions
Hazardous reactions do not occur.

Conditions to avoid
Avoid heat, sparks, open flames and other ignition sources. Avoid contact with incompatible materials. Minimize dust generation and accumulation.

Incompatible materials
Strong oxidizing agents.

Hazardous decomposition products
11. Toxicological information

Information on likely routes of exposure

**Inhalation**
Wood dust, treated or untreated, is irritating to the nose, throat and lungs. Prolonged or repeated inhalation of wood dusts may cause respiratory irritation, recurrent bronchitis and prolonged colds. Some species may cause allergic respiratory reactions with asthma-like symptoms in sensitized individuals. Prolonged exposure to wood dusts by inhalation has been reported to be associated with nasal and paranasal cancer.

**Skin contact**
Handling may cause splinters. Prolonged contact with treated wood and/or treated wood dust, especially when freshly treated at the plant, may cause irritation to the skin. Abrasive handling or rubbing of the treated wood may increase skin irritation. Some wood species, regardless of treatment, may cause dermatitis or allergic skin reactions in sensitized individuals.

**Eye contact**
Dust may irritate the eyes.

**Ingestion**
Not likely, due to the form of the product. However, ingestion of high concentrations of dusts generated during working operations may cause nausea and vomiting. Certain species of wood and their dusts may contain natural toxins, which can have adverse effects in humans.

Symptoms related to the physical, chemical and toxicological characteristics
Wood dust: May cause nasal dryness, irritation and mucostasis. Coughing, wheezing, sneezing, sinusitis and prolonged colds have also been reported. Depending on wood species may cause respiratory sensitization and/or irritation. Symptoms can include irritation, redness, scratching of the cornea, and tearing. May cause eczema-like skin disorders (dermatitis). Airborne treated or untreated wood dust may cause nose, throat, or lung irritation and other respiratory effects.

Information on toxicological effects

**Acute toxicity**
Not expected to be acutely toxic.

**Skin corrosion/irritation**
Dust may irritate skin.

**Serious eye damage/eye irritation**
Dust may irritate the eyes.

**Respiratory or skin sensitization**

*AGCIH Sensitization*
Wood/Wood dust (CAS N/A) Dermal sensitization. Respiratory sensitization.

*Canada - Alberta OELs: Irritant*
Disodium octaborate tetrahydrate (CAS 12280-03-4) Irritant

*Canada - Manitoba OELs Hazard: Dermal sensitization*
Wood / Wood dust (CAS N/A) Dermal sensitization

*Canada - Manitoba OELs Hazard: Respiratory sensitization*
Wood / Wood dust (CAS N/A) Respiratory sensitization

*Canada - Saskatchewan OELs Hazard Data: Sensitiser*
Wood / Wood dust (CAS N/A) Sensitizer

**Respiratory sensitization**
Exposure to wood dusts can result in hypersensitivity.

**Skin sensitization**
Exposure to wood dust can result in the development of contact dermatitis. The primary irritant dermatitis resulting from skin contact with wood dusts consist of erythema, blistering, and sometimes erosion and secondary infections occur.

**Germ cell mutagenicity**
No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.

**Carcinogenicity**
May cause cancer by inhalation. This classification is based on an increased incidence of nasal and paranasal cancers in people exposed to wood dusts.

*AGCIH Carcinogens*
Disodium octaborate tetrahydrate (CAS 12280-03-4) A4 Not classifiable as a human carcinogen.
Wood / Wood dust (CAS N/A) A1 Confirmed human carcinogen. A2 Suspected human carcinogen.

*Canada - Manitoba OELs: carcinogenicity*
Disodium octaborate tetrahydrate (CAS 12280-03-4) Not classifiable as a human carcinogen.
Wood / Wood dust (CAS N/A) Confirmed human carcinogen. Suspected human carcinogen.

*IARC Monographs. Overall Evaluation of Carcinogenicity*
Wood / Wood dust (CAS N/A) 1 Carcinogenic to humans.
US. National Toxicology Program (NTP) Report on Carcinogens
Wood / Wood dust (CAS N/A)  Known To Be Human Carcinogen.

Reproductive toxicity  This product is not expected to cause reproductive or developmental effects.
Specific target organ toxicity - single exposure  Not classified.
Specific target organ toxicity - repeated exposure  Not classified.
Aspiration hazard  Not likely, due to the form of the product.
Chronic effects  Chronic exposure to wood dusts can result in pneumonitis, and coughing, wheezing, fever and the other signs and symptoms associated with chronic bronchitis. Individuals with pre-existing disease in or a history of ailments involving the skin, kidney, liver, respiratory tract, eyes, or nervous system are at a greater than normal risk of developing adverse effects from woodworking operations with this product.

12. Ecological information
Ecotoxicity  The product is not classified as environmentally hazardous.
Persistence and degradability  No data is available on the degradability of this product.
Bioaccumulative potential  No data available on bioaccumulation.
Mobility in soil  The product is insoluble in water.
Mobility in general  The product is not volatile but may be spread by dust-raising handling.
Other adverse effects  No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations
Disposal instructions  Dispose in accordance with municipal, provincial, and federal regulations. DO NOT BURN! Ash may be toxic and a hazardous waste; combustion vapors may be toxic.
Local disposal regulations  Dispose in accordance with all applicable regulations.
Hazardous waste code  The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products  Dispose of in accordance with local regulations. This material must be disposed of in a safe manner (see: Disposal instructions).

14. Transport information
TDG  Not regulated as dangerous goods.
IATA  Not regulated as dangerous goods.
IMDG  Not regulated as dangerous goods.
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code  Not applicable.

15. Regulatory information
Canadian regulations  This product has been classified in accordance with the hazard criteria of the HPR and the SDS contains all the information required by the HPR.

Controlled Drugs and Substances Act  Not regulated.
Export Control List (CEPA 1999, Schedule 3)  Not listed.
Greenhouse Gases
Not listed.
Precursor Control Regulations
Not regulated.

International regulations
Stockholm Convention Not applicable.
Rotterdam Convention Not applicable.
Kyoto protocol Not applicable.
Montreal Protocol Not applicable.
Basel Convention Not applicable.
